SUMMARY

Machine Learning Research Engineer with 7+ years across **Robotics, Computer Vision, and Generative AI**. Experienced in **Transformers, LLM post-training, agentic systems, and large-scale ML infrastructure** for production environments. Led ML initiatives and cross-functional projects in enterprise SaaS, robotics, and digital health. Backed by strong academic foundation with publications in top ML and robotics conferences and multiple international robotics competition titles.

EXPERIENCE

AI Engineer

Feb '26 - Present

- *Waive Medical*

Vancouver, BC, Canada.

- **Built and led an end-to-end Agentic** medical workflow automation.
- **Document Understanding**
- **Named Entity Recognition**

Machine Learning Engineer

Nov '22 - Feb '26

- *Blue Boat Data*

Vancouver, BC, Canada.

- **Built and led an end-to-end reliable Agentic workflow** that converts natural-language queries into production-grade analytics.
- Architected a **secure multi-agent system** for **intent parsing, metadata retrieval, validation, and structured IR generation**.
- Implemented a **deterministic SQL agent** handling complex multi-table and hierarchical queries with **guaranteed correctness**.
- Designed a **typed intermediate representation layer** to constrain LLM behavior and eliminate nondeterminism.
- **Automated over 70% of customer queries**, accelerating decision-making and reducing analyst load.
- **Led cross-functional collaboration** to define requirements, shape system evolution, and uphold reliability standards.

Research Assistant

Sep '19 - Nov '22

- *Simon Fraser University and Huawei Canada*

Burnaby, BC, Canada

- Worked on **human trajectory and pose prediction** with a **novel non-autoregressive transformer model (ICRA 2023)**.
- Developed **probabilistic, model-based intent inference** with **inverse reinforcement learning** for human motion understanding ([ICRA 2022](#)).

Machine Learning Research Engineer Intern

Aug '21 - Dec '21

- *Hinge Health*

San Francisco, CA, USA

- Implemented **single-shot, bottom-up 3D human pose estimation** from monocular RGB using lightweight, real-time model architectures.

Data Engineer

Jan '18 - Mar '19

- *Rahnema Co.*

Tehran, Iran

- Designed **microservices and scalable data pipelines** powering enterprise analytics dashboards and delivering actionable business insights.
-

SKILLS

Languages: C/C++, Python, Bash, Java, JS

Cloud, OS, Frameworks, Libraries, and Databases: AWS, Azure | Linux | Docker, K8s, Git, ROS, CircleCI, LangChain, LangSmith, vLLM | NumPy, Pandas, Scikit-learn, OpenCV, PyTorch, TensorFlow, Hugging Face | MySQL, SQL Server, Oracle DB, MongoDB

EDUCATION

Simon Fraser University, British Columbia, Canada

M.Sc. in Computing Science

Sep '19 – Aug '22

Thesis: Probabilistic and Optimal Human Navigational Intent Prediction

Amirkabir University of Technology (Tehran Polytechnic), Tehran, Iran

B.Sc. in Computer Engineering

Jul '13 – Jul '18

Thesis: Design and Implementation of an Embedded Deep Learning Based Advanced Driver-Assistance System (ADAS)
